History: This message has been forwarded.

That's great news, Tad. Thanks for the update. I'm sure that the effort that your agency is making is much appreciated by the private well owners in the area.

Carol,
I believe I did mention to Rick Cobb during a telephone conversation concerning some low levels of MTBE obtained that we do have wells down gradient of Ellsworth identified, but will not be testing until later in the project (August or Sept). I will let you know when and where at a later date. So far we have tested about 300 wells and have only identified low levels of MTBE at a couple of homes. We still have a long ways to go in the project, but are encouraged by the results so far. We will keep in touch. Have a great day.

Hi Thad,

Re: the attached e-mail. I did not hear back from you, and Rick Cobb and I were wondering whether DuPage County Health Dept. found some wells to test near 75th St., south of (downgradient from) the Ellsworth Industrial Park/Downers Grove Groundwater investigation site.

I am copying Tom Krueger, Regional Counsel with U.S. EPA on this, as I am sure he would also like to know what is happening in regards to private well testing in the area. Thank you for any update you can provide.

Sincerely,

Carol L. Fuller
